ECONO FROST

ENERGY SAVING NIGHT COVERS
FOR SUPERMARKETS & GROCERY STORES

Retailers Across the Nation Install Econofrost Night Covers to Protect Perishables Against Power Outages!

Minimize YOUR Risk: One major retailer told us they lost \$21,000 in their dairy cases alone during a power outage. Don't let that happen to you.

Install Econofrost Night Covers on all your open refrigerated cases and, in the event of a power outage, pull them down to trap cold air inside the case and to prevent the warm ambient store air from entering; **your cases will hold temperature for 3-6 hours after the power goes out!**

It's an OPEN and SHUT Case!

Continued...

Savings by protecting your perishables with Econofrost during a single power outage can more than pay for your Econofrost installation. Significantly more hygienic than cardboard, plastic or burlap, Econofrost woven aluminum night covers create a thermal barrier to protect and prolong the life of perishable products.

Econofrost Night Covers also save 36% energy every hour they're used, and generate significant nightly savings from reduced shrink & discard.

The #1 Night Cover in the world - the Econofrost 9000 Series Night Cover easily retrofits to cases from any refrigerated case manufacturer and is available in 4ft, 6ft, 8ft & Custom Lengths.

We would love the opportunity to demonstrate firsthand the incredible savings gained by installing Econofrost Night Covers.

**Call 1-800-519-1222 or email info@econofrost.com
to test Econofrost in your stores!**
